State Farm Insurance Companies

SERFF #: SFMA-134676753

Company Tracking #: PV-47876

Property and Casualty Section – ID Department of Insurance – January 30, 2026

Objection 1:

Please revise your Rate Stabilization rule to conform to the Department's Notice to Property & Casualty Insurers, January 01, 2022, Revised May 26, 2022, 8. Rate Capping/Stabilization. The implication in this filing is that stabilization would be required for over seven years. This is not a "temporary" stabilization but rather a long-lasting stabilization that is unfairly discriminatory per the guidance in the Department's referenced Notice.

Response:

We maintain our position that the stabilization rules as originally filed are appropriate and not unfairly discriminatory. However, based on the department's request, we will update the Final Coverage Premium rule so that it no longer applies after 3 years from the original renewal business implementation date. This means all customers will have moved to their ultimate rate by 3.5 years from implementation regardless of the remaining change to ultimate. If the Department is comfortable with this approach, we will proceed to amend the filing packet and rate manual accordingly.
